SERIES: "VERTICAL WISDOM FOR HORIZONTAL LIVING"

LESSON TWO:
"WATCH OVER YOUR HEART" *(Pro. 4:23)*

I. Types of hearts

II. Can we know what kind of heart we have? Yes! How?

III. Look at what Jesus said about this (Matt. 15:16-20; Pro. 4:23).

IV. The way things get into our heart is through our eyes and ears.

V. Jesus said that the pure in heart will see God (Matt. 5:8; see also Matt. 13:18-23).

VI. This is why we need to watch over our hearts.

Blasphemous Theory #1: The Big Bang

According to *Merriam-Webster Dictionary*, blasphemy is the act of insulting or disrespecting God. Many scientists today, in their arrogance, refuse to acknowledge God and, instead, theorize the universe and all life within it are products of natural, rather than supernatural cause. That's blasphemy.

The Big Bang Theory states that a single, extraordinarily dense and extremely small particle rapidly expanded (i.e., exploded) to create the universe as we know it today.

The observable universe is 93 *billion* light-years across. Scientists estimate that it contains 60 sextillion stars and planets, not including moons, asteroids, pulsars, and black holes. By the way, a sextillion is a billion trillion. So, that's 60 followed by 21 zeroes: 60,000,000,000,000,000,000,000.

Further, the Big Bang Theory flies in the face of two immutable, *proven* laws of physics. These laws are facts, not theories.

First of all, it violates the *law of conservation of mass*, which states that mass can neither be created nor destroyed. How ludicrous is it to believe that a particle much smaller than the dot over this "i" could contain all of the matter within our universe?

Secondly, the Big Bang Theory violates the *law of entropy*. Simply stated, explosions create chaos, not order. That's analogous to detonating dynamite inside an oak tree in order to create a finely finished armoire.

In His perfect design, God set the Earth in optimum distance from the Sun and blanketed it with a breathable atmosphere to sustain His creation. Our moon is positioned ideally for creating tides, supporting animal life, and stabilizing our climate.

There was no boom. No bang. No rapid expansion of a dot. It was His glory.

—in His service, dan
